

Islip, NY –Islip Town Supervisor Phil Nolan recently visited the Brentwood Recreation Center to view the improvements made to the children’s performance arena. The arena is designed to accommodate plays and shows for the children who attend the Brentwood Recreation Center.

The stairway that arches over the arena and functions as the main exit from the gymnasium had fallen into serious disrepair. The Town’s Parks Department and Engineering Division constructed a new concrete stairway with safety railings.

Supervisor Nolan is pictured inspecting the stairway with Dave Janover, Town Engineer.
